

# Company Profile

## New Innovative Wheel Generator

Mr. Roller is a leading manufacturer of quality casters for Industrial applications. We are extremely pleased to announce the completion of our latest expansion.

We are a 3rd generation family run business that keeps on the cutting edge of manufacturing technology. Nothing is too big or too small.

We design and manufacture our products directly on the premises.

We carry a broad range and large inventory of casters and wheels because we know that timely delivery is crucial.

Mr. Roller products are being used by many of North America's leading corporations.

Our objectives are to guarantee the supply of superior products with extraordinary service.

Our unwavering commitment to you is to deliver the best values bar none.

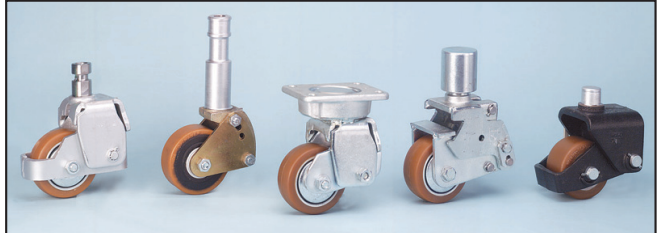

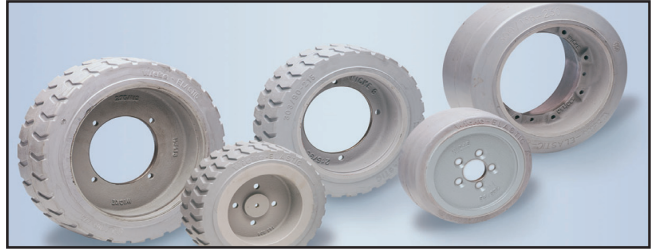

To accomplish this, we consider quality first and foremost in our operations with a constant view to innovation.

At Mr. Roller, our business starts and ends with our customers.

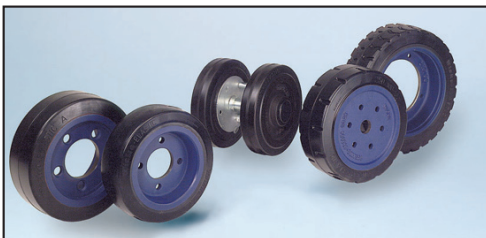

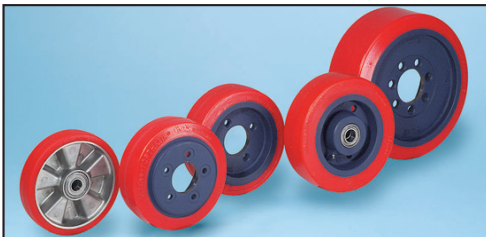

Please come and visit our facilities and join a winning team.

Let us show you the way to roll.

*Architects of Polyurethane*
